Mechanical Seals Total Solutions

Steel Bellow Seal - ISPL 2415

with API Plan 11 & 62

Applications:

- *Balanced / Unbalanced type spring seals*
- *Independent on direction of rotation*
- *Inherently pressure balanced*
- *Rigid and strong metal bellow*
- *Suitable for high temperature*

Welded metallic bellow seals are designed to avoid most probabilities of failure. As they do not have dynamic sealing devices like O-ring, wedges, etc. which cause shaft grooving or fretting. Replacing springs with metal bellows ensure even loading and self cleaning to avoid clogging. Most commonly used for thermic fluid applications.

ISPL 2415 A
